

TELMEX International Private Line

- IPL standard service provides fully managed, digital communications capacity at speeds of nx64 Kbps dedicated solely to each customer.
- Redundancy options provide customizable levels of protection, including the last mile.
- World-class customer service is available 7x24x365 in English, Spanish or Portuguese.

Telmex International Private Line is a dedicated circuit connecting two or more locations supporting simultaneous, two-way transmission of voice, data, video, or any signal that can be encoded digitally — in any combination — enabling customers to create their own private networks and to expand their reach.
